

Conservation of diploma documents of National Institute of Design, Ahmedabad: 43 diploma records were received for conservation at the Institute. All the diplomas were highly damaged and required conservation along with digitization and binding. They were fumigated before giving treatment. Objects were documented, dry cleaned and binding was removed. Each folios of diploma records were de-acidified and stains removed. Tears and holes were repaired, spine guarded, lined, samples of pieces & photographs were pasted as in previous format. Re-stitched the diplomas along with archival binding. Butter sheet was inserted for separation of sample and photographs. Original binding was restored and pasted on binding board as a cover.
